PARTS BULLETIN No. 10-10

02-11-10

Subject: REPLACEMENT MONITOR SYSTEMS
Topcon Kee X20 i.l.o. Farmscan Canlink 3000 / 3500

Previous Bulletins have advised of the problems being experienced by Farmscan, and the possible difficulties in obtaining Spare Parts and Service backup. While some backup is still available, it may not be enough for all Multistream owners to feel comfortable in continuing to use Farmscan systems. For these owners, we can offer the Topcon X20 as a replacement system.

The monitor system components cannot be mixed and the complete Farmscan system must be removed. Please note that the Proximity Sensors on our Metering Units and the Flow Meter Module on our Liquid System are Ausplow components and are common to both systems.

<u>Multistream Type</u>	<u>Tanks</u>	<u>Gran</u>	<u>Liqu</u>	<u>X20 Kit P/No</u>	<u>RRP excl. GST</u>
