PARTS BULLETIN No. 3-08

08-07-08

**Subject: AUSEEDER DBS WEAR PARTS -
Availability and Prices - as from 1st JULY 2008**

We have all heard in recent months about the dramatic increases in the prices of raw materials and energy supplies. While this may have been good news to the mining and resources sector, it has not been so good for manufacturers and the users of their products.

At Ausplow, we have traditionally tried to keep our prices as stable as possible, to avoid re-issuing price lists at short intervals. Our last spare parts price list was issued in 2005 and, while some items have been adjusted since then, the recent cost increases have made this list obsolete.

All parts prices will have to be reviewed and a new price list issued. This process will take some time to complete, so an interim list is attached, primarily covering our ground-engaging and wearing parts which form the bulk of Dealer's pre-season parts orders.

IMPORTANT NOTE: Special Blade Versions

In the past we have been able to make special versions of DBS Blades to meet owner's particular requests.

Production restrictions are making this impossible to continue. We will NOT be offering special blade versions this year, or in the foreseeable future. The only blades that will be made and stocked are those on the attached list.

Mike Kilroy
Parts Manager
