PARTS BULLETIN No. 2-09

09-06-09

Subject: AUSEEDER DBS – PRESS WHEEL SIDE ARMS

Part No. 1373 Press Wheel Arm – Standard

Has Been Superseded By

Part No. 11131 Press Wheel Arm – Wide - Standard

Part No. 1373 was fitted as standard on all Seeding Units from 1998 through to the end of December 2006.

Part No. 11131 was first made available as part of the Mud Wheel Option during the 2005 seeding season. It was then fitted as standard on all Seeding Units from the beginning of January 2007.

Both of these arms are directly interchangeable and the only practical difference is the clearance between the arm and the Press Wheel Tyre.

Performance of the machine will not be adversely affected by mixing of these arms, although owners may prefer to replace old 1373 arms with new 11131 arms in pairs.

Supplies of Part No. 1373 Arms have now been exhausted and all future factory orders will be substituted with Part No. 11131 Arms.
