PARTS BULLETIN No.14-15

22-09-15

Subject: LIMITED PRODUCTION CAPACITY FOR 2015-16

Due to strong Machine orders for this coming season, Ausplow recommends spare parts orders for manufactured parts be placed **ASAP** to ensure certainty of delivery for seeding 2016.

These manufactured parts include DBS Coulter Kits, Wings Extension kits, and general machine modifications. This will allow Ausplow sufficient time to procure and manufacture long lead time parts, and assemblies during the peak production period.

Ausplow's new manufacturing facilities are currently being built in Navel Base to accommodate increasing demand for Ausplow products. This facility will not be fully operational until early 2016, and we would appreciate your assistance and patience in regard to the above.
