

PARTS BULLETIN No. 4-18

14-12-18

Subject: NEW VERSION 4 REAR SCRAPER ARM KIT P/N 27491

The V4 rear scraper arm has been modified to improve its durability for customers in hard soil and extreme conditions.

The rear scraper arm pressing Part Number 27491, has now been converted into a kit number and will include a new spacer and washer plate at no additional charge.

27491 Rear Scraper Arm Kit \$25.00 RRP Excluding GST

NSS	Scraper Arm Pressing V4 Tine (not sold separately)	x1
31833	Scraper Arm Mount Plate V4 Tine (Spacer)	x1
27493	Scraper Washer Plate V4 Tine	x1

Design changes include:

- The rear scraper arm pressing has received a minor increase on chamfer height.
- The scraper arm washer plate length will increase by 3mm.
- A new aluminium spacer will be introduced to provide extra clamping support.

The Version 1 scraper arm is fully endorsed for use in conjunction with the new spacer and washer plate. Ausplow will not be retrofitting the new scraper arm onto machines currently in the field.

Replacement base unit tines and seeding units will be supplied with the latest upgrades.

These parts will be available from February 2019.
