PARTS BULLETIN

No: 6-22

11-07-22

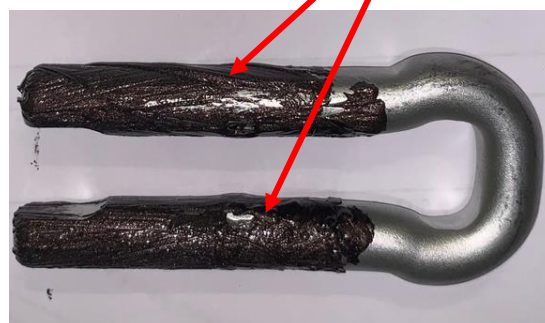

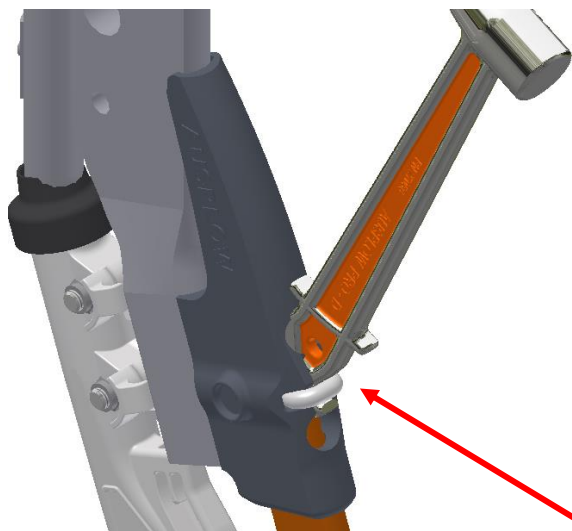

Subject: Blade Retaining Pin #27055

This Bulletin is to inform Dealers and their Ausplow customers who have the PRO-D blade that it is highly recommended the 27055 pins that hold the Pro-D Blade in the blade adaptor are coated with a film of anti-seize paste whenever they are inserted into the blade adaptor.

The anti-seize paste will reduce the effort required in fitting and removing the Blade Retaining pin.

The anti-seize paste will reduce the likely hood of corrosion forming between the pin and blade adaptor which can make removal of the pin difficult.

Shown below is an example of a Blade Retaining pin coated in a typical anti-seize paste. Please note where on the pin the paste is to be applied.
