Information

This spare parts manual covers the Ausplow Primary and Secondary Air Kits Spare Parts.

Throughout this manual some generic acronyms will be used:

ORB: Obsolete Replaced By,

NLA: No Longer Available,

BSN: By Serial Number,

N/A: Not Available or Not Applicable,

BSO: By Special Order (extended lead times may apply),

NS: Not Shown,

NSS: Not Supplied Separately,

SS: Stainless Steel,

OAH: Over All Height, OAL: Over All Length.

Due to the age of some machines and Ausplow's policy of continuous improvement, a number of changes may have been made from the original build specification of a machine.

It is advised that ALL parts be double checked where possible with the more detailed information provided within different areas of this manual.

Identifying features and dimensions are provided to assist with identification of components. Parts that are correctly supplied but don't fit due to the failure of an individual to use the identification methods provided may be subjected to a restocking fee.

Components that have been manufactured to a BSO requirement may not be eligible for return. Ausplow reserves the right to change specification/s of components without notice.

Spare Parts Return Policy

Ausplow parts may only be returned by Ausplow Dealers under the following conditions:

- Provide a **copy of the Ausplow Sales Order/Tax invoice** which the goods were purchased on with the returned goods.
 - That way we know who they were from, when they were ordered and what Branch is to receive the credit.
- **List the part numbers and quantities** of the returned items.
- Provide a brief description of **why the goods are being returned**,
 - Ie: incorrectly supplied, incorrectly ordered etc
 - This helps us identify if the restocking fee is applicable.

- The return freight is at the **Dealer's expense**.
- The returned items must be in **resalable condition**.
 - Ie: in a clean, unused and undamaged condition
- A standard **20% restocking fee** on the Dealer Net Price applies.
- International orders and special orders are non-refundable.

- **Prior approval** of Ausplow General Management required for **any bulk returns.**

When all information is received, stock is counted and assessed as re-saleable, a credit note will be sent less the 20% restocking fee on the Dealer Net Price. No credit will be processed unless all the required information is received.

If more than a few items are to be returned, and if purchased more than 12 months ago, please **advise the Parts Section prior to returning these items.**

Procedure for Warranty Claims

- Contact the Ausplow Warranty Manager (Service Manager) initially.
- Send a completed Warranty Claim form (below) to our Warranty Department: warranty@ausplow.com.au
- If instructed by Service Manager, you may need to return parts claimed under warranty to Ausplow or request pictures of parts to be emailed.
- If approved an Ausplow Claim Reference Number will be assigned and a Warranty Sales order will be created at no charge and will advise when the order is ready.
- Where labour or subcontract cost are being claimed a separate Warranty Claim Form – Labour/Outsource (below) is to be submitted.

1.0 Air Kits - Primary

This manual details parts for the Primary Air Kits and Secondary Air Pac's.

The **Primary Air Kits** are 5" or 6", Double or Single shoot.

The Secondary air kits are called **Air Pac's** and consist of 63mm and 32mm rubber air hose, secondary risers, heads and supports.

When fitting hoses, it is important to avoid tight turns.

Refer to the Ausplow DBS Auseeder Assembly Manual for pictures of a correctly configured hose kit.

Travis couplings were introduced in 2016 to the primary air systems.

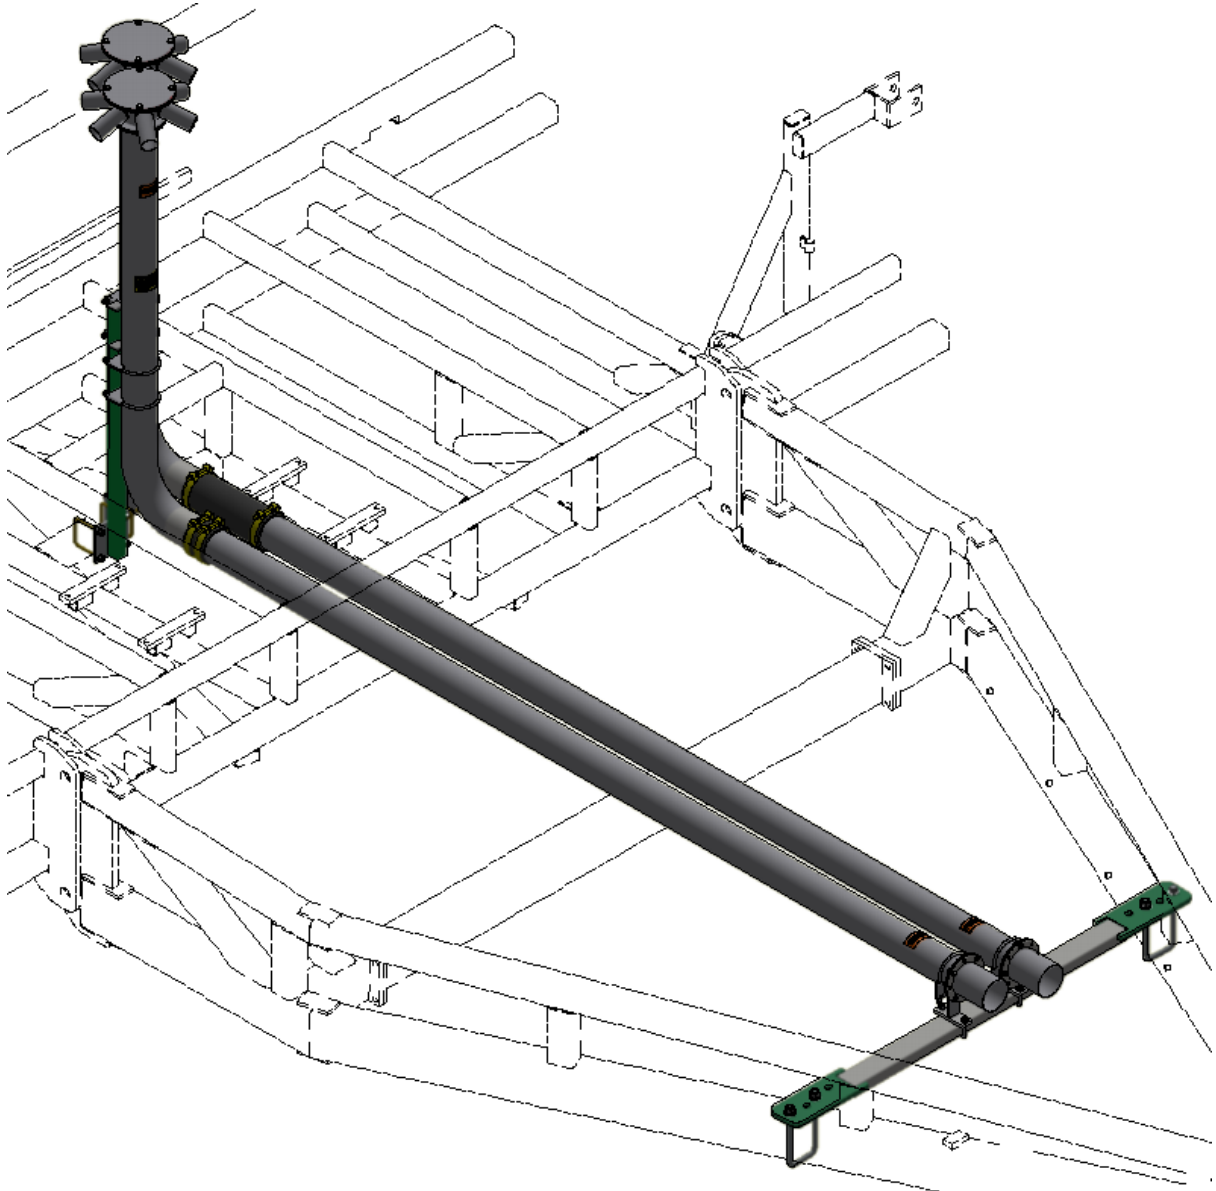

In 2020 all standpipes and delivery tubes supplied in stainless steel as single flange or no flange only.

In 2022 Primary Head lids with a cushion gasket changed to stainless steel.

During 2023 Granular Sectional Control was introduced on the Primary Standpipes.

In 2025 Telescopic secondary standpipe mounts were introduced and replaced old type standpipe mounts

	NS	27974	TRAVIS COUPLER FEMALE 6"

2.12 Travis Coupling Conversion

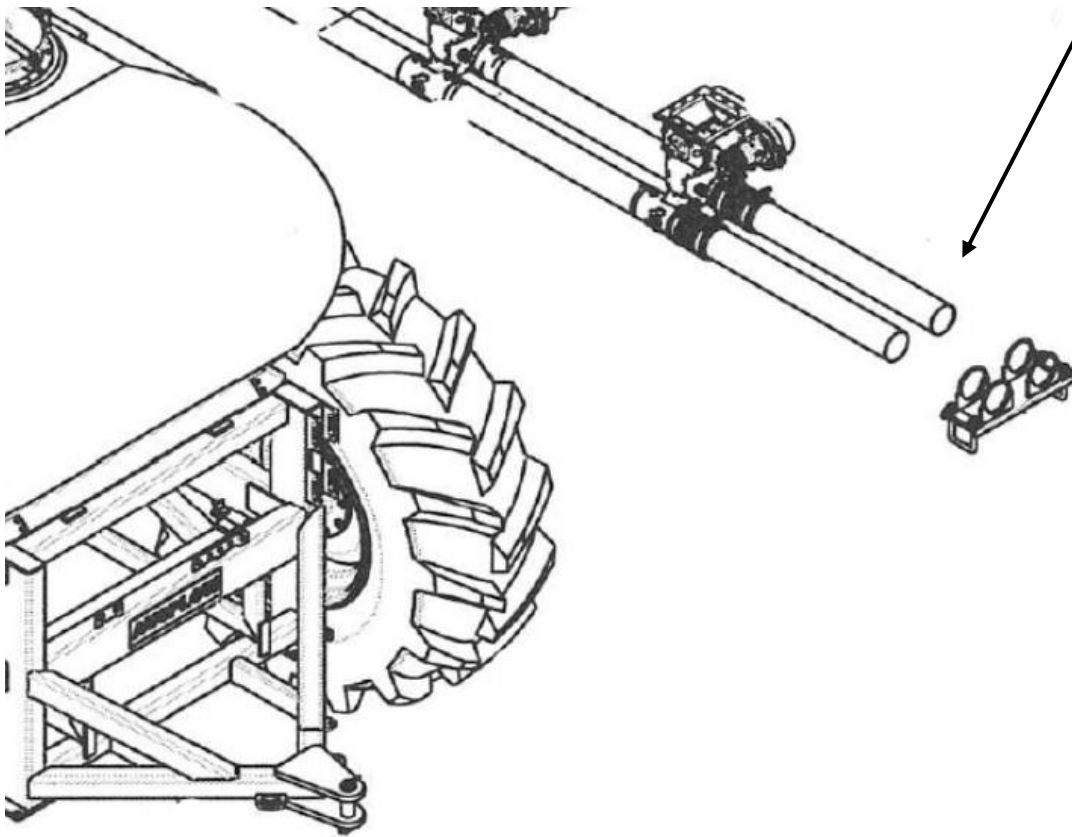

To convert older steel Primary air delivery tubes to the Travis coupling system, the longer side of the Travis Coupling Male End should be trimmed by approx. 40mm so that an overall length of 160mm is achieved. That end is then welded to the outlet tube of the Multistream Primary air delivery tube.

5" Travis Coupler Male End # 27969

6" Travis Coupler Male End # 27968

Trim this end by approx. 40mm and weld to old type steel air delivery tubes.

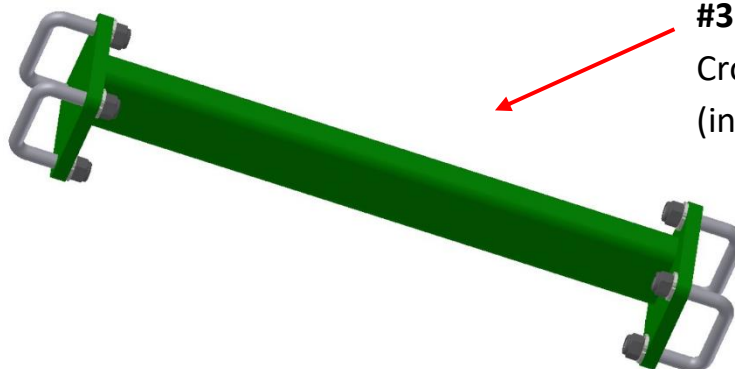

2.13 6" Primary Standpipe Mount Crossmember

For older D300-61 machines that require a 6" Primary air system, a crossmember is required to support the two 6" Primary standpipe mounts as shown below.

Air Tube Hump Coupler

2015 Hump couplers were used in Multistream air delivery hose kits:

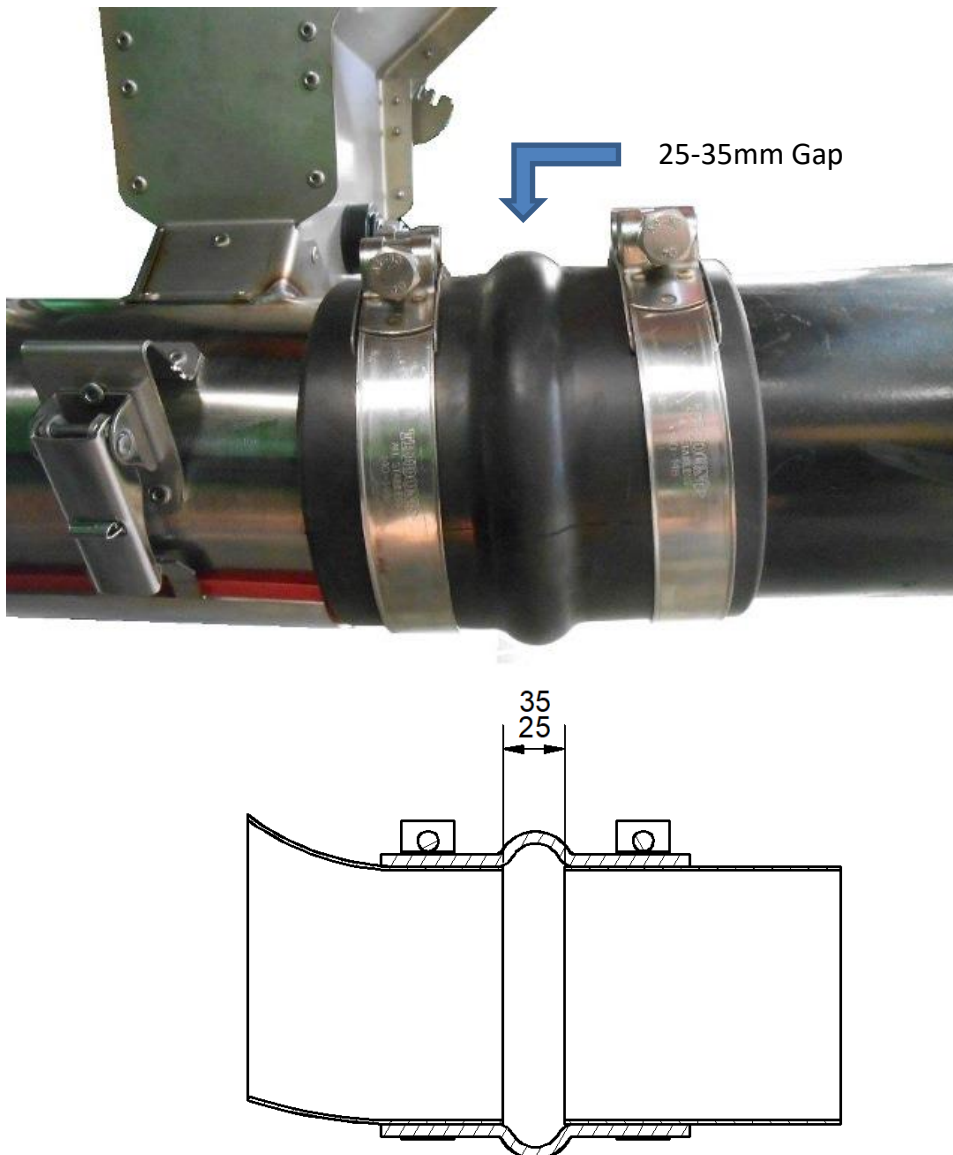

27288 **Single Hump Coupler 127mm (5")**

09744 Hose Clamp T-Bolt 131-139mm SS

27289 **Single Hump Coupler 152mm (6")**

09512 Hose Clamp - T-Bolt -162-174mm SS

Ausplow recommends trimming the steel air delivery pipe to create a 20mm gap between air pipes and the metering units to provide proper fitment of the coupler.

5.0 Hose Adaptors

Version 3 Tine Assembly is easily identified by its stainless steel seed and fertiliser tube. All earlier versions used steel seed and fertiliser tubes.

Upgrade kits are available to upgrade older versions to the new stainless steel seed and fertiliser tubes, see the Ausplow DBS Tine Spare Parts Manual for details.

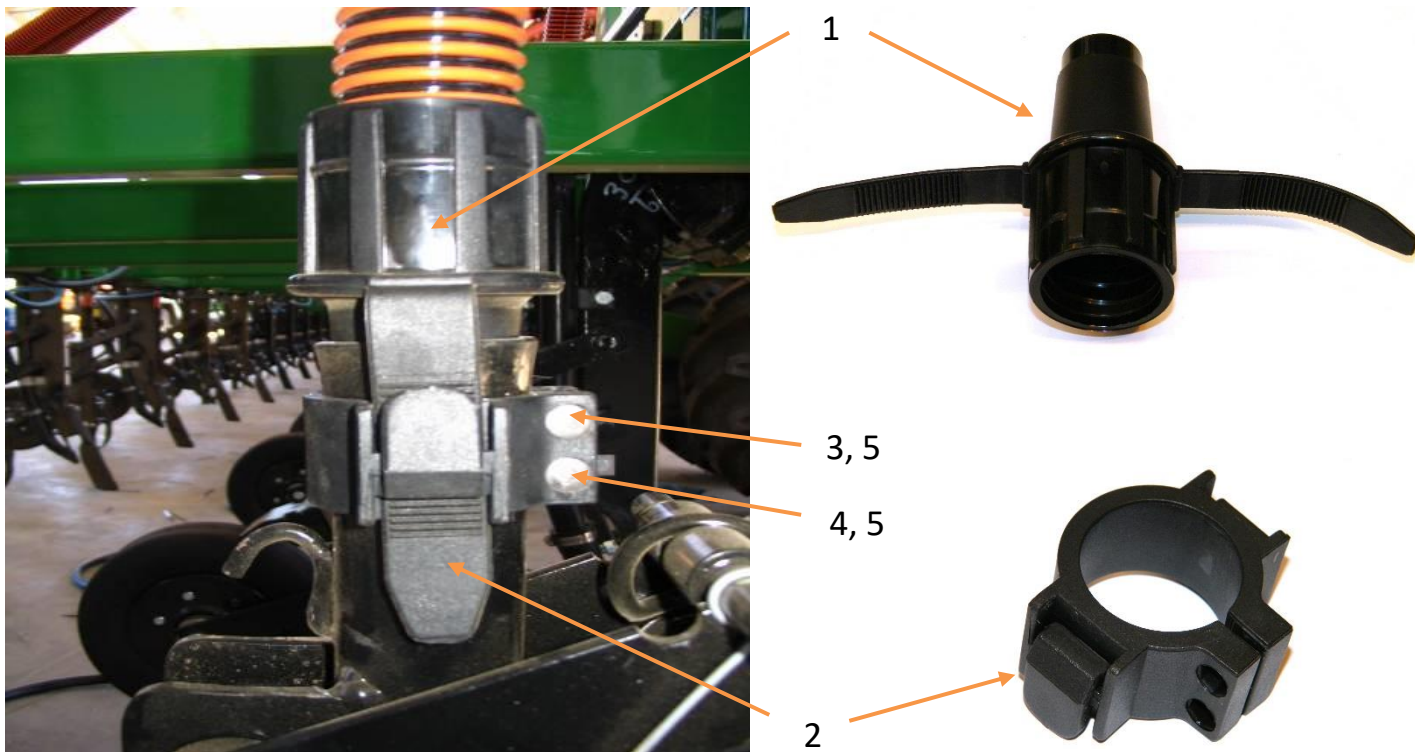

There are rubber hose adaptors available to connect the 32mm hoses to the older Version 2 steel seed and fertiliser tubes. These are also sold as kits which supply parts to convert one tine assembly.
