PARTS BULLETIN

No. 1-22

6-01-22

Subject: PSO & Weekly Orders Allowable Parts

Ausplow has created a list of spare parts that are allowed to be ordered on future Preseason (PSO) or Weekly Stock orders.

This list is a guide to assist Dealers when placing PSO or Weekly orders to ensure the correct parts are ordered and minimises any variance with items on their own Purchase Order.

This list is to reflect high usage parts such as Ground Engaging Tools (GET) and any individual component parts on DBS and Easitill tine assemblies.

Other common usage parts such as bearings, seals, filters, pins etc and some selected items are also included as allowable parts.

Ausplow will be looking to enhance the Webshop so that when a user enters items in a Preseason or Weekly order and those parts are Not Allowable, a warning message will alert the user to this fact.

In the meantime, please ensure your staff who place orders using the Ausplow Webshop are aware of this list, a copy of this list next to your workstation may assist with this.
