PARTS BULLETIN

No: 4-24

12/7/24

Subject: UPDATES TO AUSPLOW MANUALS 2024

Several Ausplow manuals have been updated with the latest changes and are available on the Webshop to view, download, print or purchase.

Main changes were:

Auseeder Parts V6.3 -	New phasing and wing folding cylinder seal kits
DBS Tine Parts V3.5 -	New tine torque setting diagram, shorter scraper arm
MS Series II Parts V2.3 -	New steering axle Series 3
Air Kit Parts V4.1 -	Sectional control parts
Camera/Lighting Parts V2.5 -	New camera harnesses
Auseeder Operators V3.1 -	Updated Tine torque setting diagram, shorter scraper arm
Auseeder Assembly V4.7 -	D260-70 Air Hose 8 run layout, shorter scraper arm

Many Dealers find it useful to download these to their desktops. This makes it quicker when searching for information rather than waiting for slow downloads when a quick answer is required.

It is recommended your Parts staff use these as well as the Webshop to obtain parts and pricing information. If the answer cannot be found after looking at these reference sources, send us an email and we will reply with an answer.

The Quick Reference Guide (V3) has also been updated containing useful info on how to place Online orders, changes to existing products, Warranty and Returns. It is recommended all your Parts staff are aware of its contents.

Also available on the Webshop are the Ausplow Operators and Assembly manuals to view, download, print or purchase. These manuals are also a good source of information for your Parts sections to use when dealing with Ausplow owner general enquiries.
