PARTS BULLETIN No. 4-15

04-03-15

Subject: NEW PART - HEAT EXCHANGER CORE WITH INTERNAL BYPASS
 - HEAT EXCHANGER CORE UPGRADE KIT
 - HEAT EXCHANGER ASSEMBLIES WITH INTERNAL BYPASS

In late 2014 Ausplow made changes to Multistreams hydraulic heat exchanger core. The external fittings including 5 bar hydraulic check valve, elbow, and tee fittings are now incorporated inside the heat exchanger core.

This action has reduced the physical connections and therefore potential leaking points.

Old Style

New Style

The heat exchanger cowl, frame, and rear cover are compatible with the new style core element, but the core is **not** directly interchangeable without hydraulic hose upgrade kit Part Number 15768.

Once stock has been depleted of heat exchanger core P/N 07271 (old style), **customers will need to upgrade to the new style heat exchanger core with internal bypass, using upgrade kit P/N 15768 for replacement.**
